

The huge growth in the amount of information that enterprises are churning out today has compelled business leaders to take a strategic relook at their traditional information management techniques. Unlocking the potential of this combination of structured and unstructured data has become a top priority for today's enterprises. ABMCG comes with years of experience in Business Process Management, Information Management Systems and Enterprise Content Management along with its premium partnerships with industry leaders like IBM, EMC, Microsoft and Kofax. This enables us to offer a portfolio of strategic solutions that deliver break-through improvements in productivity along with significant savings in time, cost and effort by helping our clients efficiently manage information and uncover insights.

Business Process Management

The ABMCG's BPM Service Team partners with clients to automate their business processes by leveraging proven workflow management frameworks and leading process management platforms, enabling them to become more efficient, agile and customer-centric organizations. Our services include advisory & consulting, implementation, testing, ongoing maintenance and support.

Enterprise Document and Records Management

Efficiently managing documents and data is essential to the enterprise but it can be a serious drain on an organization's resources. ABMCG provides automated solutions that simplify management of these vast and growing enterprise assets. By providing cradle-to-grave management capabilities, ABMCG helps our clients streamline document based activities and enforce compliance according to legal, fiscal and regulatory requirements.

Data Management

ABMCG enables organizations to capture and validate all types of unstructured document information accurately and securely. ABMCG also transforms paper documents into process ready information through its expertise in several market leading imaging platforms including IBM, EMC Captiva, etc.

Business Process Management

ABMCG has been at the forefront of managing both structured and unstructured content. Our ECM Service team has successfully executed many projects across the globe. ABMCG has helped organizations across multiple domains harness their entire ecosystem of knowledge assets, records, documents and multimedia to create new opportunities, improve efficiencies and realize greater savings.

Benefits

Content Strategy & Roadmap definition

Product-fitment

Health-Check Services

Case Management

Boost customer satisfaction through better management and faster resolution of customer cases. ABMCG technology empowers customer-facing employees to get rapid access to the right information (structured and unstructured) and analytics to resolve customer cases faster and more effectively.

ECM Consulting

ABMCG provides premium consulting services where our experts partner with clients to study their information management landscape. Based on the specific requirements, we then outline an appropriate and customized content management strategy and suggest the most effective solutions to meet the business objectives.

Enterprise Content Migration

Content migration often proves to be a complex and daunting activity for even the most seasoned IT professionals. With expertise in over 10 different content management platforms, ABMCG provides comprehensive content migration services that take into account the compatibility requirements and the underlying risks to ensure zero downtime during migration.
